POLISH EARLY MUSIC 2. Wacław z Szamotuł, *Nunc scio vere*. First edition, 2026. Edited by Mikołaj Derduń.

This edition is free. The text, any music and the source files are released under the Creative Commons Attribution 4.0 International licence (CC BY 4.0): you may copy, perform, record, adapt and publish them, for any purpose, provided you name the editor. The music itself is in the public domain.

Source files, corrections and later editions: <https://github.com/mderdun/pol-ren/editions/nunc-scio-vere>.

Set in Junicode; music engraved with LilyPond and Gregorio.

THE WORK

NUNC SCIO VERE ('Now I know for certain') is the Introit for Saints Peter and Paul (29 June). Medieval Polish graduals also give it to Saint Peter's Chains (1 August). Waław set the antiphon and the *Gloria Patri*. The psalm verse between them was sung to its chant tone, and the antiphon was then repeated.

The setting survives in one source, an eight-leaf fragment of an organ tablature of about 1590. Aleksander Poliński found it, and it is called the 'Castle' tablature after the State Art Collections in the Royal Castle, Warsaw, where it was later kept. It passed to the National Library and was destroyed in 1944. The fragment was probably part of the Łowicz tablature, which contains a cycle of introits by Marcin Leopolita and others. *Nunc scio vere* stood on fols. 7v–8r, headed *In die Apostolorum Petri et Pauli. Nunc scio vere W. S.* ('On the day of the Apostles Peter and Paul. Now I know for certain. W. S.') The monogram is usually read as Waław's. Tomasz Czepiel doubts the attribution.

Waław studied in Poznań and Kraków. He became composer to Sigismund II Augustus in 1547 and later served Mikołaj Radziwiłł 'the Black'. Two other Latin motets by him survive, both printed in Nuremberg: *In te Domine speravi* (1554) and *Ego sum pastor bonus* (1564). A Kraków inventory of 1572, made after the death of Jurek Jasiuczyc, lists 'offitia Vaczlavove' ('Waław's offices'). Poles used *officium* for the introit, so these may have been settings like this one.

THE MUSIC

The introit chant (third mode) runs through the setting in equal values, lightly ornamented. It moves between voices. The Tenor has it for *Nunc scio vere* (bars 3–12) and the Cantus from *quia* to the end of the antiphon (13–56). In the *Gloria Patri* the Bassus recites the psalm tone on c (63–71). These entries are marked [c.f.]. The other voices treat each clause of text as a point of imitation. The antiphon ends on E, the final of the mode. The *Gloria Patri* ends on A, the last note of the psalm tone's termination.

THE RECONSTRUCTION

Mirosław Perz made a vocal version from photographs of the two pages and published it in 1966 (Ⓟ). He set it a minor third above the tablature (Ⓣ) and added his own underlay. His commentary records every reading of Ⓣ that he changed. This edition starts from Ⓟ, returns the music to the pitch of Ⓣ and weighs each of Perz's changes against Ⓣ. Most stand. At bars 6, 9, 30 and 81–83 Ⓣ's reading is restored. The critical notes list every decision, so any of them can be reversed.

SOURCES

- Ⓣ Organ tablature, c. 1590 ('Castle' or 'Small Warsaw' tablature; Poliński collection), fols. 7v–8r: *In die Apostolorum Petri et Pauli. Nunc scio vere W. S.* Text incipit only. Destroyed 1944. Glass-plate photographs of three pieces from the fragment, probably of 1928, are in the Institute of Musicology, Jagiellonian University (IMuzUJ 014–017).
- Ⓟ Mirosław Perz, vocal reconstruction from photographs of Ⓣ, in Hieronim Feicht (ed.), *Muzyka staropolska / Old Polish Music* (Kraków: PWM, 1966), pp. 61–65; commentary pp. 380–81. Up a minor third; values as in Ⓣ; editorial underlay. *Base text*, revised against Ⓣ.

EDITORIAL METHOD

This edition follows the rules of the series, set out in the guide *Editorial principles* and cited here by number. What follows is particular to this piece: its choices and its departures.

Pitch and note values. Pitch is that of (T). At this pitch the antiphon ends on E with no signature, the normal position of the third mode, and the voices fit the ordinary low clefs (C₁, C₃, C₄, F₄). Cantus c'–e'', Altus f–a', Tenor d–e', Bassus E–a. A vocal original in this mode would have been notated this way, and nothing suggests the intabulator transposed it. (P)'s pitch would need three flats in the signature, which no source of the period uses. Written pitch was not sounding pitch, though (see Performance).

Note values are twice those of (T) and (P) (principles 5.1). As Perz transcribes it, (T) moves in semiminims and fusae, with semifusae at cadences, values a vocal motet of about 1550 would hardly use. Doubled, the music moves in semibreves and minims under ♢, like Wacław's two printed motets. The bar is a breve, so bar numbers match (P). The mensuration sign is editorial, since (T) has none (principles 5.4).

Score. Voice names and clefs are editorial, since (T) has neither. Rests at entries follow (P), because a tablature notates rests only in part. The antiphon ends on semibreves under (P)'s corona (bar 56). The *Gloria Patri* ends on longs (principles 5.7).

Accidentals. A tablature spells every pitch, so accidentals before notes come from (T). Accidentals above the staff are editorial, and Perz suggested all of them (principles 7.2).

Underlay. (T) gives only the text incipit, so every syllable under the notes is editorial. The series rules apply throughout (principles 10.1–10.10). What follows is particular to this piece.

Model. Wacław's Kraków *Lamentationes* (1553) are the evidence for principles 10.7. They set the text mostly one syllable to a note and put one melisma before each cadence, on the stressed syllable of the last word (*mé-am*, *lú-cem*, *bó-minum*, *su-á-rum*). The Nuremberg prints of his motets agree at clause ends but place the words too loosely to settle more.

Stress. By the Kraków penultimate rule (principles 10.8; Liban c. 1539 teaches the same): *Dóminus*, *ángelum*, *erípuit*, *Heródis*, *exspectatióne*, *Iudaeórum*, *Spiritui*, *príncipio*, *saeculórum*.

Chant and imitation. The voice with the chant takes the chant's words in the chant's order. Each point of imitation takes its opening motif from a phrase of the chant, and the words of that phrase go with it (principles 10.10). Perz used the same method for Leopolda's introits from this tablature (1967). Within a word, the stresses above place the syllables, not the chant's neumes. The chant sets *Nunc* to its whole opening neume (f–d–g–f–e). The Bassus, which states the motif first, keeps that long *Nunc*; the Tenor, Cantus and Altus sing *Nunc* on its first two notes and *sci-* on the leap to g.

Words and music. Where the rules leave a choice, I weigh the words against the line (principles 10.6). Where the music declaims, the stressed syllable takes the long note or the high point (*Dóminus*, *ángelum*, *Heródis*, *exspectatióne*, *Iudaeórum*), and the light words take one or two notes, as a rule off the beat and leading into the syllable after them (*et nunc*, Cantus, bars 72–73). Where the line sings, its long runs stay, on open vowels: *Nunc* at the head of the Bassus (bars 1–3), *Glo-* at the head of the doxology in Cantus and Altus (bars 57–60), *e-* of *erípuit* in the Bassus (bars 26–28). The voices often change syllable at different times.

Repeats. Repeated words are editorial and printed in italics. Some are placed for the stress. The Cantus sings *et erípuit* once on the chant's semibreves and then repeats *erípuit me*, so that the repeat's *-rí-* takes the run from c'' (bars 24–29). Altus and Bassus sing *omni* twice (bars 37–39), so that the second *óm-* takes the run. The Cantus sings *Sancto* once, with a single run before the cadence (bars 65–68).

Words left out. The Altus leaves out *et* before *Spiritui* (bar 64), so that *Spi-* takes the breve e'. The Bassus leaves out *et* when it repeats *erípuit me* (bar 26). Both follow principles 10.13.

Departures. In a few places an unstressed syllable keeps a run of three or more notes, because the notes allow nothing else. A repeated note forces a new syllable just before the cadence (principles 10.9): Cantus *-re* in bar 6, Tenor *-rum* in bar 81, Bassus *-ne* in bars 43–44. Or the next note that can take a syllable is too far off: Altus *He-* in bar 32, Bassus *et* in bar 23, Tenor *-spe-* in bars 41 and 45. In *Iudaeorum* the dotted head motif carries *Iu-* in Cantus and Bassus, as the imitation requires. In bar 80 the Cantus's high *e''* falls on *sae-* of *saeculorum*, the word's secondary stress, and *-ló-* takes the three minims that follow. Elsewhere a three-note group on a weak syllable is one note with two passing semiminims. One syllable falls on a semiminim after a dotted minim (Bassus, bar 41, *-ti-*; principles 10.1).

Alternatives. The Tenor and Bassus could sing *Nunc* over the whole opening motif, as the chant does. I prefer the stress on the leap, and the same underlay for the motif in all four voices.

PERFORMANCE

At written pitch the setting suits an all-male chapel like Sigismund Augustus's, with boys or falsettists on the Cantus (*c'–e''*) and a low Bassus (*E–a*). The chapel paid boy singers (*pueri, adolescentes cantores*) alongside its men, and Waclaw's *Lamentationes*, in clefs lower still, were written for low men's voices. Every voice lies two to five semitones lower than in Waclaw's printed motets, the Cantus most of all. A minor third higher, as in (P), the four ranges match his printed ones almost exactly. That is the pitch for a mixed choir, and a sound choice for any choir, since written pitch fixed only the relations between the voices.

A minim pulse of about 60–72 suits the declamation. The organ may double the voices. The order is Antiphon, psalm verse (cantor, in chant), *Gloria Patri*, Antiphon. The Introit was often sung in alternation with the organ. Perz argued in 1967 that the *Gloria Patri* settings of Leopold's introits in the same tablatures were organ versets, and that the organ could play the repeat of an introit while the choir said the words quietly. This edition texts the *Gloria Patri* because its Bassus recites the psalm tone syllable by syllable. An organ doxology or an organ repeat of the antiphon has as good a claim. Marcin Szelest has recorded the *Gloria Patri* from (T) as an organ piece (Accord, 2023).

Polish Latin suits the piece, with the sounds given in the series pronunciation guide. Stress follows the penultimate rule (principles 10.8). The guide's *tsi* for *ti* before a vowel keeps the *i* as a syllable, as the underlay does: *ex-spe-cta-ti-o-ne*.

TEXT AND TRANSLATION

Ant. Nunc scio vere,
 quia misit Dominus angelum suum:
 et eripuit me de manu Herodis,
 et de omni expectatione plebis Iudaeorum.
Ps. Domine, probasti me, et cognovisti me:
 tu cognovisti sessionem meam,
 et resurrectionem meam.
 Gloria Patri, et Filio, et Spiritui Sancto.
 Sicut erat in principio, et nunc, et semper,
 et in saecula saeculorum. Amen.

*Now I know for certain
 that the Lord has sent his angel
 and has rescued me from the hand of Herod
 and from all the expectation of the people of the Jews.
 Lord, you have searched me and known me;
 you know my sitting down
 and my rising up.
 Glory be to the Father, and to the Son,
 and to the Holy Spirit. As it was in the beginning,
 is now, and ever shall be, world without end. Amen.*

Acts 12:11; Psalm 138 (139):1–2. The verse is given as in the *Graduale Romanum*. Medieval Polish graduals end it at *sessionem meam*; singers who prefer that reading apply the termination to *ses-si-ó-nem me-am*.

CRITICAL NOTES

READINGS OF (T) ALTERED IN (P)

References are to bar, voice and note; tied continuations are not counted. Pitches are at the pitch of this edition (c' = middle C), and note values are those of this edition, twice those of (T) and (P). Each note gives (T)'s reading, Perz's change and his reason, then this edition's decision in small capitals.

Perz's changes fall into three groups. Some cure a fault of counterpoint, such as parallel octaves, a mishandled dissonance or an inner voice given to the wrong part. These are **ACCEPTED**, because restoring (T) brings the fault back. Others remove a figure Perz thought instrumental. He judged it at the halved values of the tablature. At this edition's values the figures are ordinary vocal ornaments, so (T) is **RESTORED** unless it creates a fault. The last group joins repeated notes 'for the underlay'. (T) is restored where its repeated notes can carry syllables, as Stoquerus requires (principles 10.9), and (P) stands where they cannot.

BAR	VOICE	NOTE
6	C	(T): e' tied from bar 5, e' (minims), f' d' (semiminims), e' (minim). (P): tied breve e' and breve rest, the figure being instrumental. At doubled values it is a common cadential ornament, and makes no fault. T RESTORED (<i>ve-re</i> repeated).
9	T	(T): in the second half, minim c' and semibreve c' tied into bar 10. (P): dotted semibreve, for the underlay. The repeated c' takes -o. T RESTORED .
20	A	(T): in the second half, minim f' and semibreve f' tied into bar 21. (P): dotted semibreve, for the underlay. (T) would give five repeated f' to the four syllables of <i>-lum an-ge-lum</i> . P ACCEPTED .
25	A, T	(T): A c', T g. (P) exchanges them, to avoid octaves and fifths with B. (T) gives octaves A-B twice and fifths T-B. P ACCEPTED .
26	A	(T): e' in place of the rest. Omitted in (P) for octaves with B. The octave is approached, not consecutive; but the rest lets the Altus breathe before its entry at <i>et eripuit</i> , and the e' is probably the organist's filling. P ACCEPTED .
30	A	(T): first note e'. (P): c', for the cadence the text creates. (T)'s e' supplies the only third of the C chord, which otherwise stands bare for a semibreve. T RESTORED .
31	A, T	(T): A c', T a. (P) exchanges them, restoring the tenor's line. P ACCEPTED .
34	A	(T): second note a. (P): b, for the cadence. The cadence to C has the 4-3 suspension in the Cantus, and b is its leading note. P ACCEPTED .
35-37	C	(T): two separate breves f'. (P) ties them, for the underlay. The second f' falls after the clause has ended, and no syllable is left for it. P ACCEPTED .
37	A	(T): the first two notes are one dotted semibreve d'. (P) divides it (semibreve, minim) to keep the imitation exact. P ACCEPTED (principles 10.10).
49-50	C	(T): minims g' e' in place of the tied semibreve g'. (P): g', for octaves with T. The octaves are real. P ACCEPTED .
49	B	(T): second note without rhythm sign; read as a minim.
52	C	(T): in the second half, semiminims d' c' d' e'. (P): dotted minim d', semiminim e' (instrumental figure; fifths with T). The figure is vocal at these values, but the fifths are real (C-T, bar 52). P ACCEPTED .
53	T	(T): first note f. (P): a, for octaves with C. The octaves are real. P ACCEPTED .
64	T	(T): third note d. (P): f, calling d an error. d would be a dissonant semiminim left by leap. P ACCEPTED .
71	A, T	(T): A c', T a. (P) exchanges them (imitation in A; octaves between T and B). The octaves are real. P ACCEPTED .

BAR	VOICE	NOTE
76–77	A	(T): one breve e' in each bar. (P): two semibreves each, for the underlay. The split gives <i>et nunc, et semper</i> in the declamation the other voices have. P ACCEPTED.
81	T	(T): third note b. (P): g, for the cadence. (T)'s b sounds the resolution against the Cantus's suspended c''. P ACCEPTED.
81–83	C	(T): minims c'' a' b' g' f' a', semibreves b' c'', minims c'' a'. (P): dotted semibreve c'', minim b', semibreves a' b', dotted semibreve c''; (P) calls the sequence instrumental. At these values it is a vocal sequence in minims, consonant throughout, without parallels. T RESTORED (<i>saeculorum</i> twice).
86	C	(T): two minims in place of the semibreve a'. (P) joins them, for the underlay. (T) would put the final syllable before the cadence. P ACCEPTED.
86	B	(T): second note d. (P): f, for octaves with A. The octaves are real. P ACCEPTED.

OTHER NOTES

BAR	VOICE	NOTE
15–16	C, T	Parallel fifths (b' e' to a' d', bar 16), left as in (T), following (P).
44	C	b' as in (T), a tritone above the bass F on the third minim; (P) does not alter it. bb', as in bar 45, is printed in brackets as an option.
44	B	The flat is (P)'s; (T) has B, against bb in the Tenor a minim later.
54	A, T	Parallel fifths on the first minim, as in (P).
56	A	e' (small note) is (P)'s addition, in square brackets in (P); (T) presumably continued c' from bar 55. (P)'s e' makes fifths with B (a–e', E–b); the tied c' does not, and is a fair alternative.
57–62	B, T	Bassus rests for six bars, Tenor for three; the <i>Gloria Patri</i> opens in two voices, as in (T).
88	A	c# (major final chord) is in (T); at bar 87 the sharp is (P)'s.

UNDERLAY

BAR	VOICE	NOTE
3–12	T	Cantus firmus. <i>Nunc</i> takes f–d of the chant's opening neume and <i>sci-</i> its g–f–e, as in the other voices' statements of the motif (see the method). <i>-o</i> takes g, <i>ve-</i> the a and the run after it, and <i>-re</i> the cadence note c' of bar 9. The clause is then repeated.
13–56	C	Cantus firmus. Syllables fall on the chant's notes, e.g. <i>om-</i> on g' (bar 40), <i>-ni</i> on g'–a' (bar 41), and three syllables of <i>exspectatione</i> on the repeated g' of bars 42–43. In <i>Dominus</i> the run is on <i>Do-</i> , and <i>-mi-</i> takes the g# before the cadence (bar 17).
24–29	C	The chant's melisma on <i>eripuit</i> falls on <i>-it</i> . The Cantus sings <i>et eripuit</i> once on the chant's semibreves and then repeats <i>eripuit me</i> , so that <i>-rí-</i> takes the c'' of bar 27 and the run after it, and <i>me</i> the cadence note of bar 29. Elsewhere, where a free voice had a melisma of more than four semibreves, the clause is repeated instead, as in Waclaw's prints (e.g. T, <i>exspectatione</i> , bars 44–48; B, <i>eripuit me</i> , bars 25–30).
44–46	C	The stressed <i>-ó-</i> of <i>exspectatione</i> takes the chant's c'' at bar 44 and the run after it. <i>-ne</i> falls on e' in bar 46.
50–56	ALL	The stressed <i>-o-</i> of <i>Iudaeorum</i> falls on a strong minim or a high note in every voice (e.g. C, the minim f' that opens bar 53 and rises to a').
63–71	B	The Bassus recites the psalm tone on c; its mediant shape (d c c, c–a, c) carries <i>-ri-tu-i San-cto</i> syllabically.
